SUMMARY

Second-year Computer Science student who likes building small, fast developer tools and the infrastructure behind them. Looking for a software engineering internship.

EDUCATION

University of Waterloo – Waterloo, ON
BCS Computer Science | Expected graduation: April 2028
Co-op program. Relevant courses: Data Structures and Algorithms, Operating Systems, Databases, Computer Networks.

EXPERIENCE

Software Engineering Intern, Maple Lantern Labs (fictional) – Toronto, ON

May 2026 – Aug 2026

- Built a TypeScript service that batches webhook deliveries and retries failures with backoff, replacing a nightly cron script.
- Added structured logging and a latency dashboard so the team could see slow requests per endpoint.
- Wrote integration tests with Playwright that run on every pull request.

Backend Developer Intern, Kestrel Yard Software (fictional) – Waterloo, ON

Sept 2025 – Dec 2025

- Implemented a PostgreSQL-backed job queue in Go with idempotent workers and a small admin page.
- Migrated three internal scripts from Python 2 to Python 3 and added unit tests for each.

PROJECTS

TabTrail – browser extension

- A Chrome extension in TypeScript that records the pages visited during a research session and exports a tidy reading list.
- Uses a shadow DOM overlay so it never clashes with page styles.

Pantry Planner – web app

- A React and Hono app that suggests meals from what is already in the fridge; recipes are stored in SQLite.
- Deployed with Docker; end-to-end tests run in GitHub Actions.

SKILLS

Languages: TypeScript, Python, Go, SQL, C++

Tools: React, Node.js, Hono, PostgreSQL, Docker, Playwright, Git

INTERESTS

Hackathons, bouldering, and film photography.
